FKK

KYOKUTO KOGEN CONCRETE SHINKO K.K. 極東鋼弦コンクリート振興株式会社

Since 1952, FKK, as Freyssinet's licensee, has been developing the pre-stressed concrete related technologies with some modifications to meet the growing needs from building and construction market, particularly bridges and viaducts of highways and railway in Japan, FKK-Freyssinet methods are widely used in all types of bridges including cable stayed and extradosed bridges, LNG tanks and other structures.

Sumitomo's
TENSIONING MATERIALS for
PRESTRESSED CONCRETE

SUMITOMO ELECTRIC INDUSTRIES, LTD., has been a leading supplier of Tensioning materials (Prestressing Strand, Prestressing Bar and Grips for Prestressing Strand) since the very Beginning of this industry.

Sumitomo has always made it a point to know the needs of Prestressed Concrete Industry and to meet those needs through Improvement of the quality of Tensioning Materials and development of new types of tensioning products.

Successful research and development programs have established Sumitomo as an international supplier
