
PREFACE

In past years, the Japan Prestressed Concrete Institute (JPCI) and Japan Concrete Institute (JCI) have jointly published the *National Report of Japan on Structural Concrete* in book form in conjunction with The International Federation for Structural Concrete *fib* Congress, with the aim of broadly sharing Japan's major concrete structures, buildings, and their associated technologies with engineers and designers around the world.

At the 6th *fib* Congress, held in June 2022 in Oslo, Norway, JPCI and JCI delivered a presentation on recent prize-winning concrete bridges and buildings. Beginning this year with the *National Report of Japan on Structural Concrete 2022*, the report will be published digitally instead of in book form.

The contents range from prestressed concrete bridges and buildings awarded prizes by JPCI and JCI over the past four years and their associated technologies to guidelines established by the two institutes and an overview of their committee activities. We hope this report will offer an opportunity for engineers worldwide to learn not only about Japan's outstanding concrete structures and buildings, but also about these two organizations and their activities.

We extend our sincere gratitude to the authors, the JCI and JPCI secretariates, and the members of the editorial committees for their extensive work in preparing this report.

March 2023

S. Saito

Shigehiko SAITO
Chair, JPCI National Report Editorial Committee

Y. Uchida

Yuichi UCHIDA
Chair, *fib* National Report Editorial TG, JCI International Activities Committee

Editorial Committee of the National Report of JPCI
